School: Hollywood Elementary
Teacher: Mrs. Oosterhous

If I were mayor, I would help my community and make it a magnificent place for people who live in the community and also for visitors.

Some sustainability in the community would be “going green”, cleaning up water (streams, lakes, watersheds), land pollution, finding ways to use solar power, wind power, and be more environmentally friendly, recycling, and making buildings more “eco-friendly”.

To have public safety and gun control in the community I would make the streets safer, making this community friendlier for families, getting rid of illegal guns and educating people on the dangers of guns.

In our community, I would like to make better transportation. I would eliminate traffic, make more public transportation (buses), carpool (eliminate air pollution from cars), have more sidewalks and streets that are safer to walk/ride bikes on and more use of bikes instead of cars. Some ideas for schools in college park are raising money for schools, building new schools, and making more educational programs. To help other people in the community I could make public shelters and build more homes.

If I were mayor, it would be a big responsibility and I would have to take care of my community very well.
